3D CAD DESIGN

Part and Assembly Modeling

Handle all aspects of your part and assembly modeling and transform ideas and concepts into virtual 3D models.

2D Design

Create production-ready 2D drawings that are always current and clearly communicate how to manufacture and assemble your designs.

Productivity Tools

Easily analyze, compare, check and report on your designs.

Design Reuse and Automation

Simplify the reuse of existing design data with search, automation and configuration tools that help you speed up the creation of new designs.

Interference Check

Before going into production, verify in 2D and 3D that your parts and assemblies will fit, assemble and operate correctly.

Manufacturability Checks

Review your designs for Draft, Undercut, Thickness and Hole Alignments early in the development process to ensure manufacturability.

Advanced CAD File Import/Export

Convert incoming CAD data into SOLIDWORKS 3D CAD format and export SOLIDWORKS data to other CAD applications using 30+ translators.

Extended Reality (XR) Exporter

Export CAD data for AR, VR and web viewing experiences while retaining geometry, appearance, motion studies, display states and more.

CAD Standards Checking (Design Checker)

Establish design standards and check drawings (or models) against them to create uniform designs and documentation.

KEY CAPABILITIES

3D CAD DESIGN

Automated Tolerance Stackup Analysis (TolAnalyst™)

Automatically check the effects of tolerances on parts and assemblies to ensure consistent fit of components and verify tolerancing schemes before manufacturing your designs.

Design for Cost (SOLIDWORKS Costing)

Continuously check your designs against cost targets with automatic cost estimation tools fully integrated within the 3D CAD solution.

Reverse Engineering (ScanTo3D)

Recreate designs with the ability to import, edit, evaluate and create solid geometry from scanned point-cloud and mesh data.

Advanced Photorealistic Rendering

Easily create photographic-quality images from your 3D models early in the design process to get feedback and make informed design decisions.

Advanced Surface Flattening

Flatten complex, nondevelopable surfaces typically encountered in products made from textiles, like clothing, or sheet metal, like metal stampings.

Pipe and Tube Routing

Simplify the design and documentation of piping and tubing for a wide range of systems and applications, including machinery, skid systems and process plant piping.

Electrical Cable and Wiring Harness Routing

Quickly add cables, wires and harnesses to your design. Create flattened drawing representations of your 3D cables and harnesses with wire lists, connection information and bills of materials.

Rectangular and Other Section Routing

Route rectangular and round sections that include ducting, cable trays, conveyors, material handling chutes and other systems.

SIMULATION

Time-Based Motion Analysis

Realistically visualize your product moving throughout its operational cycle world, measure the forces and loads on your design, and use the data to correctly size motors and ensure product performance, quality and safety.

Linear Static Analysis for Parts and Assemblies

Calculate the stresses and deformations of geometry using Finite Element Analysis (FEA) methods, and running linear stress analysis to determine the response of parts and assemblies.

**PARAMETRIC MODELING
IN THE CLOUD**

Parametric Modeling in the Cloud

Create, review and evaluate 3D models through an intuitive parametric modeling solution that interacts seamlessly with the 3D CAD solution.

KEY CAPABILITIES

**3DEXPERIENCE
SOLIDWORKS
Standard Offer**

**3DEXPERIENCE
SOLIDWORKS
Professional Offer**

**3DEXPERIENCE
SOLIDWORKS
Premium Offer**

SUBDIVISION MODELING IN THE CLOUD

Subdivision Modeling in the Cloud

Create organic shapes quickly and easily with an intuitive modeling solution that interacts seamlessly with the 3D CAD solution.

DATA MANAGEMENT AND COLLABORATION IN THE CLOUD

Data Access and Management in the Cloud

Store, share, access and manage the latest product design information from a centralized, secure location.

Product Lifecycle Management in the Cloud

Manage the lifecycle of any type of content, such as CAD files, simulation models and documentation, across disciplines and CAD solutions. Track issues, changes and routes, and reduce conflicting edits from multiple contributors with revision control.

Collaboration in the Cloud

Collaborate in real time using configurable dashboards, social communities, Kanban-style task management, activity streams, persistent chat and video calls. Easily search, visualize, explore and mark up SOLIDWORKS and other files directly in your browser.

Governance in the Cloud

Monitor license usage, manage members, and assign and remove licenses from a single administrative dashboard, lowering administrative overhead. Easily stay up-to-date and benefit from the latest enhancements.

TRAINING AND SUPPORT

Training and Support

Get up to speed fast using online training content, a vibrant community and support from your local reseller.

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual experience twins' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production.

Dassault Systèmes' 20,000 employees are bringing value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.
